| Estimated Shortage Reserves @ 5/30/14:                                 |           | \$<br>(17,084) |

Changes from 3/31/14 estimated analysis appear due to the following:

Accounts Receivable decreased from 61k at 3/31 to 33k at 5/31. This was due to the resales of properties with liens, and the payment to the Association at turnover, some past water collection from owners selling, and other owners making payments.

The balance of the reserve account, combined with the tenant escrow accounts and Special Assessment funds still equal more than the total funds available on that date. Meaning those are protected, set aside funds, by law and we are still deficient. From my reading of Florida law on reserve accounts, commingling can only be done for investment purpose.

In early June, current BOD Treasurer Weber was asking for board members and owners to pay their July 1 quarter payment early. This suggestion, to enable payment of bills is only a temporary fix.

Current BOD President explained that the cash shortage was due to payment in May of final insurance premium, of 24k. Even if we paid monthly the insurance premiums, the reserve account would still seem deficient.

As you can see from the reserve analysis estimate, no cash was available going in to June.

On the bright side; we are way under budget this year for building maintenance and building cleaning. ????
